Description :

PDF-86c70 | During the past century, tropical rain forests have been reduced to about half of their original area, with a consequent loss of biodiversity. This book takes a close look at how this has happened and what the consequences may be, with an emphasis on those strategies that have proven successful in stemming the loss of plant and animal inhabitants. It describes the use of protected areas such as sa... *Last Stand: Protected Areas and the Defense of Tropical Biodiversity*
